

1. String doubt & string performance
2. OOP basics - classes, objects, —, this, static, final.
3. inheritance and polymorphism
4. ~~enums~~ Abstract classes & interfaces
5. enums
6. generics.

• String — password

char[] —

1. String → encrypted string
 → immutable
 []
 memory (S) + "x";

2. printing logs — memory

str
sys (str)
sys (array)
